PHONTUM PRO PRIX

Phontum Pro Prix brings you premium audio quality with native USB transmission for establishing high-fidelity sounds. The newest earpads are equipped with comfortable cooling gel and breathable fabrics for decent temperature control and long-time gaming. The large 53mm graphene diaphragm driver and the chamber system allow you to emphasize the true audio immersion.

Environmental Noise Cancellation

Phontum Pro Prix utilizes ENC sensor to capture independent signals and then distinguish the target voice and dynamic ambient noises by algorithm to further cancel the environmental noises from the mixed signal, leaving a clear voice to be heard.

Through the exclusive UIX software, the headset can achieve your listening experiences with ENC option.

UIX

7.1 Virtual Surround Effect

Get a 360° experience with Phontum Pro Prix's high quality 7.1 virtual surround sound. Lifelike audio feedback during your game allows you to hear your rivals approaching and prepare to face them!

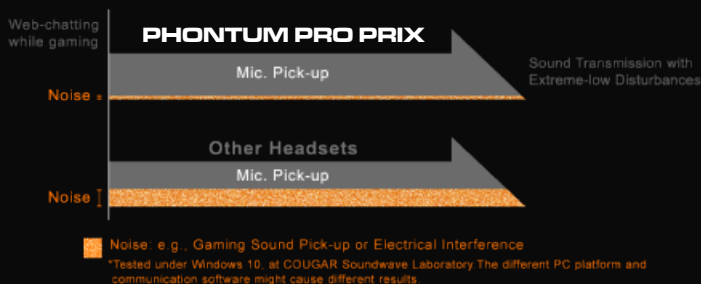

After the UIX installation, you can enjoy the surround effect during any gaming session.

7.1 VIRTUAL SURROUND

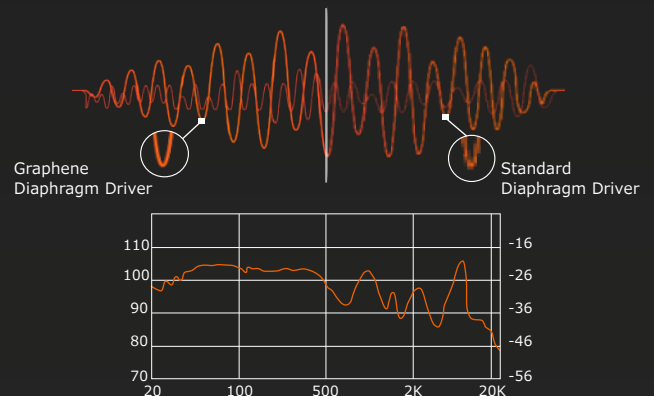

Crosstalk Reduction

Through different platforms and communication software, it can be hard to avoid crosstalk from the physical electrical connector. However, Phontum Pro Prix is equipped with true fidelity cords with well-shielding and insulation design and fine-tuned parameter for reducing the crosstalk signal.

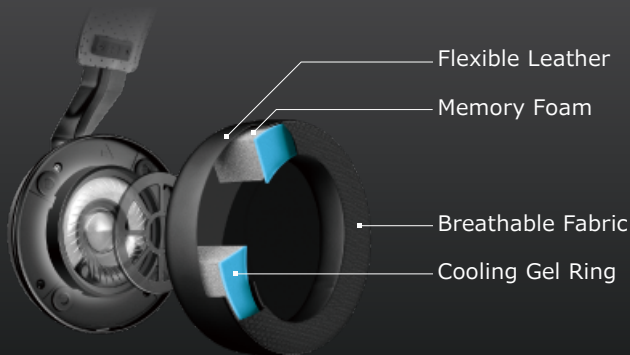

Impressive Sound Quality
